## Attitudinal Measures of Adolescent Sexuality, Gender Violence, and Sexual Diversity

@misc{ author={Igartua, Juan-José and Vega Casanova, Jair}, year={2016}, title={Attitudinal Measures of Adolescent Sexuality, Gender Violence, and Sexual Diversity}, note={Copyright - PsycTESTS® is produced and copyrighted © by the American Psychological Association, all rights reserved.; Date revised - 20161010}, abstract={The Attitudinal Measures of Adolescent Sexuality, Gender Violence, and Sexual Diversity (Igartua & Vega Casanova, 2016) were developed for the purposes of a study that examined the explanatory processes of narrative persuasion in the field of health communication within the framework of a project on entertainment-education based on audiovisual fiction. The study involved a sample of young persons in Colombia (ages 14-20), randomly distributed to three different groups. Each of the groups was exposed to a different episode of the Colombian television series "Revelados, desde todas las posiciones." The Attitudinal Measures were used to assess the impact of this series on participants' attitudes toward the topics of adolescent sexuality (6 items), gender violence (2 items), and sexual diversity (1 item). Each scale presents items that reflect the educational content of the episodes, together with other items that pose more general issues. Responses are provided using dichotomous and Likert-type response formats. For the items assessing adolescent sexuality, an indicator of a favorable attitude toward sexual decision-making is created by adding the scores of the 6 items. In addition, an index of the attitude of rejecting gender violence is created by adding the scores of the 2 respective items (alpha = .82). ### **Abstract**

The Attitudinal Measures of Adolescent Sexuality, Gender Violence, and Sexual Diversity (Igartua & Vega Casanova, 2016) were developed for the purposes of a study that examined the explanatory processes of narrative persuasion in the field of health communication within the framework of a project on entertainment-education based on audiovisual fiction. The study involved a sample of young persons in Colombia (ages 14-20), randomly distributed to three different groups. Each of the groups was exposed to a different episode of the Colombian television series "Revelados, desde todas las posiciones." The Attitudinal Measures were used to assess the impact of this series on participants' attitudes toward the topics of adolescent sexuality (6 items), gender violence (2 items), and sexual diversity (1 item). Each scale presents items that reflect the educational content of the episodes, together with other items that pose more general issues. Responses are provided using dichotomous and Likert-type response formats. For the items assessing adolescent sexuality, an indicator of a favorable attitude toward sexual decision-making is created by adding the scores of the 6 items. In addition, an index of the attitude of rejecting gender violence is created by adding the scores of the 2 respective items (alpha = .82). #### **Details**

Instrument type

Construct	Gender Attitudes; Sexual Attitudes
Classification	7500: Sex, Gender Roles, and Sexual Behavior
Purpose	The Attitudinal Measures of Adolescent Sexuality, Gender Violence, and Sexual Diversity were designed to assess the impact of an entertainment-education based television series on adolescents' sexual and gender-related attitudes.
Format	These measures are comprised of a total of 9 items. The 6-item indicator assessing attitudes toward sexual decision-making utilizes a yes $(1)/no$ $(0)$ format. The remaining 3 items utilize a 5-point scale ranging from $1 =$ "strongly disagree" to $5 =$ "strongly agree."
Permission	Contact Corresponding Author
Test name	Attitudinal Measures of Adolescent Sexuality, Gender Violence, and Sexual Diversity
Author	Igartua, Juan-José <sup>1</sup> ; Vega Casanova, Jair <sup>2</sup>
